SUMMARY

Senior Software Developer with 6+ years of experience building high-performance web applications, specializing in Next.js and React.js with fullstack capability across Node.js, Express.js, NestJS, and Laravel. Experienced in delivering scalable digital products across corporate, marketing, e-commerce, and loyalty platforms in industries including F&B, telecom, insurance, retail, and fashion. Proven ability to mentor developers, lead frontend teams, and own projects end-to-end as both developer and consultant.

EXPERIENCE

INDEPENDENT CONSULTANT

Jakarta, Indonesia · 2020 — Present

Fullstack Developer (Freelance)

2020 — Present

- Delivered end-to-end web applications for various clients, owning the full lifecycle from requirements and architecture through development, deployment, and post-launch support.
- Built across multiple stacks including Laravel, Next.js, React.js, and WordPress, with experience across PostgreSQL, MySQL, and Supabase.
- Managed client communication, scope definition, and project delivery independently.

KEY PROJECTS

- **Tukar Guling** — E-Replacement Product System for PT Sewu Segar Nusantara (Sunpride). Multi-level approval workflow for field sales product exchange requests, SAP master data sync, OCR integration, and export reporting. Laravel 12, PostgreSQL, Alpine.js, Tailwind CSS, Sanctum.
- **DCMS** — Document Management System for PT Sewu Segar Nusantara (Sunpride). Full RBAC, OCR document capture, audit trail, and external API layer with token authentication. Laravel 12, MySQL, Inertia.js, Tailwind CSS, Sanctum.
- **Streamline Cargo** — Legacy PHP → Next.js + Supabase rebuild. Multi-role cargo platform with shipment tracking, barcode scanning, and Google Maps, Exchange Rate API & transactional email notifications. streamlinecargo.id

ANTIkode

Tangerang Selatan, Indonesia · 4 yrs 9 mos

Senior Frontend Developer

July 2024 — May 2026

- Took on shared leadership responsibilities within the frontend division, supporting team coordination and technical direction.
- Mentored and supervised 4 frontend developers, providing guidance on implementation, problem-solving, and code quality.

- Responsible for onboarding and mentoring new team members, accelerating team integration, technical alignment, and productivity.
- Contributed to defining division-level standards, including frontend best practices, workflows, competency guidelines, and OKRs.
- Acted as a senior technical reference for frontend architecture, implementation strategy, and code quality.
- Collaborated cross-functionally to define project timelines, workflows, and effort.

KEY PROJECTS

- **Pocari Sweat Website** — Company Profile. Next.js, React.js, TailwindCSS, GSAP, Framer Motion, Lenis, Three.js, Matter.js. pocarisweat.id
- **Bodypack E-commerce Website** — E-Commerce. Remix.js, Shopify Hydrogen, TailwindCSS, GSAP. bodypack.com

- **Karafuru NFT** — NFT Platform. Next.js, React.js, SASS, Bootstrap, Ethers.js. Built custom REST API layer for smart contract interaction and on-chain data queries. karafuru.io
- **Mekdi Check-In** — Campaign In-App Web View Application. Next.js, React.js, Bootstrap, SASS, Framer Motion, Google Maps API.

EMPORIA DIGITAL

Tangerang Selatan, Indonesia

Frontend Developer

August 2020 — August 2021

- Led the development of mobile applications with React Native and web applications with React.js.
- Built a mobile application for selling PPOB products in less than 2 months.
- Contributed to 3 mobile application projects and 1 administrator dashboard website project.
- Managed version control using GitLab and set up GitLab CI/CD for efficient development workflows.
- Independently engineered a React.js template, establishing a uniform and efficient starting point for project development across the entire company.

KEY PROJECTS

- **IKI Mitra** — React Native. PPOB agent app for small businesses — pulsa, bill payments (PLN, PDAM, BPJS), and fund transfers to all Indonesian banks.
- **IKI Aku** — React Native. Cross-border remittance app for Indonesian workers in Taiwan, with AML compliance and multi-channel payments (7-ELEVEN, Family Mart).
- **IKI Bills** — React.js. Admin dashboard for residential clusters to manage household bills (IPL, water) and track collections via IKI Mitra outlets.

ANABATIC TECHNOLOGIES

Tangerang Selatan, Indonesia

Frontend Developer

July 2019 — August 2020

- Proficiently built websites and mobile applications, specializing in mobile development with React Native and web development using ReactJS.
- Contributed to 6 projects over the year, including mobile banking, mobile agent applications, and website dashboards tailored for administrative use.
- Created comprehensive technical and functional specification documents.
- Utilized GitHub and GitLab for effective code versioning and collaborated with team members to maintain clean, high-quality code using SonarQube.

KEY PROJECTS

- **Pocketbank** — React Native, Axios, Firebase. Mobile banking app with account overview, fund transfers, bill payments, and transaction history.
- **Mobile Agent App** — React Native, Axios, Firebase. Agent app for small businesses to sell PPOB products, process top-ups, and manage daily transactions.
- **Admin Website Dashboard** — React.js, Axios, Ant Design. Internal admin dashboard for user management, transaction monitoring, and operational controls.
